- ▶ *Less Damaging*
- ▶ *Safer for Vegetation*

EXTREME MELT WALKWAY DE-ICER is a low - corrosive, granular de-icing product used to remove snow and ice from walkways, driveways, parking lots, and roads.

When applied to snow or ice covered surfaces **EXTREME MELT WALKWAY DE-ICER** works immediately to penetrate the bond between the ice and the surface. **EXTREME MELT WALKWAY DE-ICER** dissolves slowly, penetrates deeply, and stays on surfaces longer to help prevent freezing of new ice or snow.

EXTREME MELT WALKWAY DE-ICER is used extensively by retailers, consumers, state and local government and commercial de-icing companies in conjunction with or as a replacement for traditional sand / salt applications.
